

## **Terrorism Will Happen. Be Prepared with Safety and Security Films:**

Recently in the news there have been bomb blasts in Boston. It seems that terrorist attacks are happening more often than we would like to think. It's a given that this has hit close to home. Unfortunately, it is very likely that it may happen again. As Americans we should keep vigilant, and take great effort in doing what we can to help lessen the effects if a bomb blast was to happen here.

Why wouldn't you do everything in your power to keep your home, business, or commercial building safe from a bomb blast?

Did you know that having window protection films like security films and safety films installed, along with an attachment system, can lessen the chance of injury caused by flying shards of glass due to a bomb blast?

Safety Films and Security Films (bomb blast films) can help minimize the damage should a bomb blast occur. The instant a bomb goes off it causes a blast that sends things flying into the air and windows breaking causing much of the types of injuries that you have heard about in the last few days. Having security films and safety films, installed on your windows, along with an attachment system, will help to keep the window's glass in place thus keeping the shards of glass to fly and cause damage and injury to people.

We at All Pro Window Tinting, express our deepest sympathies to the victims of this tragedy and send our prayers and love to them all.
